

## Christmas Ornaments!

If you ever wish to get lost in cyber space for hours, just google “quilted Christmas ornaments!” It’s amazing the variety of sewn and non-sewn styles to choose from.

Here are just a few links you might want to look at:

This book by Nancy Martin, published in 1988, has a number of folded ornament patterns (I picked this book up off the free table). I had made these many years ago at a workshop so I knew what a gem this book was. You cut squares and fold and layer them to get the designs you want. They are a little fiddly but I sure like the 3-D look.

My all-time favourite Christmas ornament is this one my sister picked up in Ontario. Hand sewn folded fabric!

Season's Greetings, Kathryn G.
